Terra Tachyon products attract and concentrate tachyon energy. They can be used in different ways: as pendants; for meditation; for harmonizing physical and emotional levels and all other levels of human beings too; for therapy; for supporting different kinds of energetic work; in apartments to energetically enhance the quality of frequencies of water veins or electro-smog; for harmonizing disturbing or interfering radiation and to support the physical body in its regeneration. Tachyons stimulate the dense and subtle bodies of human beings, animals and plants.

Tina Tachyon Collection

present **The deeper meaning of the StarSun:**

This pendant represents the connection between your body and the galactic forces and systems.

What happens if you wear this unique pendant?

It balances your whole system as every Tachyon object does.

But furthermore it supports your individual ability to create and observe the process of creation in a more conscious way.

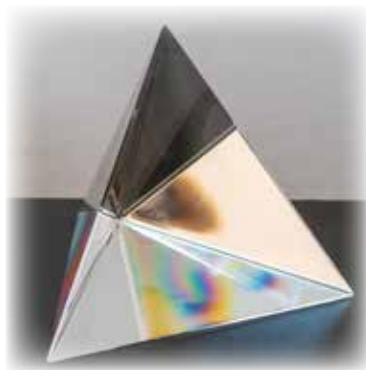

So it is not only a **StarSun** but a „creative sun“.
